

Cashier Manual

Welcome to **NexusPOS AI**. This guide will teach you how to manage the front counter, take orders, and process payments quickly and efficiently.

1. Getting Started

1.1 Login

1. Open the NexusPOS application on your tablet or desktop.
2. Enter your assigned email (e.g., cashier@teashop.com) and password.
3. You will immediately be routed to the POS terminal. (Note: You do not have access to Analytics or Settings).

1.2 Opening the POS Terminal

- The left side of the screen displays **Categories** (e.g., Beverages, Food) and a **Search Bar**.
- The center displays **Menu Items**.
- The right side displays the **Active Cart**.

2. Order Management

2.1 Creating Orders

1. Select an **Order Type** at the top of the cart: DINE-IN, TAKEAWAY, OR DELIVERY.
2. Enter the **Table Number** or **Token Number**.
3. Tap on a menu item in the center screen to add it to the cart.
4. Tap it again to increase the quantity.

2.2 Handling Mistakes and Voids

- **Decrease Quantity:** Click the - button next to the item in the cart.
- **Remove Item completely:** Click the red trash can icon next to the item.
- **Clear Entire Cart:** Click the **Clear** button at the top of the cart to start over.

2.3 Order Notes (Special Instructions)

If a customer has a special request:

1. Look at the bottom of the cart for the **Order Notes** input box.
2. Type the request (e.g., "No sugar", "Extra spicy").
3. This note will be sent directly to the kitchen.

 POS Cart Management

3. Checkout & Payments

3.1 Applying Discounts

1. Before checking out, locate the **Discount %** field in the cart summary.
2. Enter a discount percentage (e.g., 10 for 10% off).
3. The subtotal and tax will automatically recalculate.

3.2 Processing Standard Payments (Cash, UPI, Card)

1. Ensure the customer is ready to pay the **Grand Total**.
2. Select the payment method they are using: **CASH**, **CARD**, or **UPI**.
3. Click **Add Payment**.
4. The Balance Due will drop to \$0.00.
5. Click **Complete Order**.

3.3 Split Payments

If a customer wants to pay half in cash and half on a card:

1. In the **Amount** field, type the amount they are paying in cash (e.g., 50).
2. Select **CASH** and click **Add Payment**.
3. The **Balance Due** will update to reflect the remaining amount.
4. Leave the remaining amount in the box, select **CARD**, and click **Add Payment**.
5. Once Balance Due is \$0.00, click **Complete Order**.

 Split Payments Interface

4. Printing Receipts

1. When you click **Complete Order**, the order is sent to the kitchen instantly.
 2. A **Receipt Preview** modal will appear on your screen.
 3. Click **Print** to send it to your thermal receipt printer.
 4. If a customer needs a reprint later, navigate to the **Orders** tab on the left sidebar to find past receipts.
-

5. Troubleshooting

- **Printer Not Responding:** Ensure the USB or Bluetooth connection to the printer is active. Refresh the browser tab.
- **Item Not Scanning:** If you are using a barcode scanner, ensure your cursor is active in the "Search Menu Items" box before scanning.
